

Java Midterm Exam Solution

Building.java

```
public class Building {
    private String siding;
    private double squareFeet;
    public Building() {}
    public Building(String siding,double
squareFeet){this.siding=siding;this.squareFeet=squareFeet;}
    public String getSiding(){return siding;}
    public void setSiding(String siding){this.siding=siding;}
    public double getSquareFeet(){return squareFeet;}
    public void setSquareFeet(double squareFeet){this.squareFeet=squareFeet;}
}
```

Commercial.java

```
public class Commercial extends Building {
    public Commercial(){super();}
    public Commercial(String siding,double squareFeet){super(siding,squareFeet);}
}
```

House.java

```
import java.util.Scanner;
```

```
public class House extends Building{
    public House(){super();}
    public House(String siding,double squareFeet){super(siding,squareFeet);}
    public static void main(String[] args){
        Scanner input=new Scanner(System.in);
        House house=new House();
        System.out.print("Enter the siding for the house: ");
        house.setSiding(input.nextLine());
        System.out.print("Enter size of Living Room: ");
        double living=input.nextDouble();
        System.out.print("Enter size of Kitchen: ");
        double kitchen=input.nextDouble();
        System.out.print("Enter size of Dining Room: ");
        double dining=input.nextDouble();
        System.out.print("Enter size of Bedroom: ");
```

```
double bedroom=input.nextDouble();
house.setSquareFeet(living+kitchen+dining+bedroom);
input.nextLine();
Commercial commercial=new Commercial();
System.out.print("Enter the siding for the commercial building: ");
commercial.setSiding(input.nextLine());
System.out.print("Enter size of Room 1: ");
double room1=input.nextDouble();
System.out.print("Enter size of Room 2: ");
double room2=input.nextDouble();
System.out.print("Enter size of Room 3: ");
double room3=input.nextDouble();
commercial.setSquareFeet(room1+room2+room3);
System.out.println("House Siding: "+house.getSiding());
System.out.println("House Total Square Feet: "+house.getSquareFeet());
System.out.println("Commercial Building Siding: "+commercial.getSiding());
System.out.println("Commercial Total Square Feet: "+commercial.getSquareFeet());
input.close();
    }
}
```
